

BUSINESS-CLASS WEB HOSTING / COLOCATION / CONNECTIVITY / CONSULTING

HOSTED EXCHANGE 2007 RELIABLE, FULLY MAINTAINED EMAIL AND COLLABORATION TOOLS

VISI's hosted Microsoft Exchange 2007 solution offers a flexible feature set providing your business the productivity tools you need. VISI's hosted Exchange provides you with subscription-based access to Microsoft Outlook, Windows Sharepoint Services 3.0 and Exchange 2007.

STANDARD FEATURES:

Enhanced Email – Exchange 2007 harnesses the power of Microsoft Outlook, providing rich message screening and routing features. Email access is available anywhere you can connect to the Internet. Exchange 2007 accounts come with 2GB of storage per user.

Individual and Group Calendars – Schedule events, view calendars for resources and co-workers, and plan and schedule meetings with a click of a mouse.

Collaboration - VISI's Hosted Exchange email accounts include a free Windows SharePoint Services 3.0 website. SharePoint provides efficiency for workflow processes, shared document and email repository, intra- and Internet websites and blogging capability.

Shared and Private Contact Management
Exchange 2007's collaboration tools let team members create both private and group lists, and easily share and copy contact information

into Outlook address books.

Task Management – Exchange 2007's powerful contact management, task tracking, and notes features permit tasks to be assigned, delegated, and tracked efficiently and easily.

Public Folders – Frequently used documents can be placed in shared areas, accessible to all team members for viewing and to authorized users for editing— letting you easily manage document versions.

Virus Scanning and Spam Control – Every VISI managed messaging account includes leading virus detection and spam filtering software. Our tools protect your systems against virus attacks and mass emailings (SPAM), and are continuously updated for the latest threats to your productivity.

Blackberry Enterprise Server – VISI can provide Blackberry users access to their Microsoft Exchange e-mail account and functionality that are included with that e-mail account right on their Blackberry handheld device. VISI also supports Microsoft ActiveSync for Windows-based smart phones and PDAs (Windows Mobile 3.0 and above).

VISI MANAGED SERVICES AND SUPPORT

VISI's service includes all server hardware, operating systems, active directories, databases, and application software required for hosting your Exchange 2007 services. VISI installs and
